# 1 Identification

- · Product identifier
- · Trade name: Premiseal<sup>TM</sup> 250 Series Resin
- Details of the supplier of the safety data sheet
  Manufacturer/Supplier: Accella Polyurethane Systems, LLC
   1255 Kennestone Circle, Suite 200 Marietta, GA 30066

USA www.premiumspray.com

- · Information department: EH&S Department
- Emergency telephone number: During normal operating hours: (770) 528-9556 ChemTrec: (800) 424-9300

### 2 Hazard(s) identification

· Classification of the substance or mixture

Health hazard

STOT SE 2 H371 May cause damage to organs.

STOT RE 2 H373 May cause damage to organs through prolonged or repeated exposure.

Corrosion

Eye Dam. 1 H318 Causes serious eye damage.

Skin Irrit. 2 H315 Causes skin irritation.

· Label elements

• GHS label elements The product is classified and labeled according to the Globally Harmonized System (GHS).

Safety Data Sheet

acc. to OSHA HCS

· Hazard pictograms

· Signal word Danger

• Hazard-determining components of labeling: 2-dimethylaminoethanol Polyol(s) • Hazard statements

Causes skin irritation. Causes serious eye damage. May cause damage to organs.

May cause damage to organs through prolonged or repeated exposure.	
Precautionary statements	
In case of inadequate ventilation wear respiratory protection.	
Avoid breathing dust/fume/gas/mist/vapors/spray	
Wear protective gloves/protective clothing/eye protection/face protection.	
If in eyes: Rinse cautiously with water for several minutes. Remove contact l	lenses, if present and easy to do
Continue rinsing.	
IF SWALLOWED: Call a doctor if you feel unwell.	
<i>IF INHALED: Remove person to fresh air and keep comfortable for breathing.</i>	
Wash contaminated clothing before reuse.	
If skin irritation or rash occurs: Get medical advice/attention.	
If eye irritation persists: Get medical advice/attention.	
In case of fire: Use for extinction: CO2, powder or water spray.	
IF ON SKIN: Wash with plenty of soap and water.	
Store in a well-ventilated place. Keep container tightly closed.	
Dispose of contents/container in accordance with local/regional/national/interna	ational regulations.
Classification system:	
NFPA ratings (scale 0 - 4)	
Health = 1	
Fire = 1	
$\mathbf{V}$ Reactivity = 0

### 4 First-aid measures

#### · Description of first aid measures

#### • General information:

Symptoms of exposure may occur after several hours; therefore medical observation for at least 48 hours after exposure.

*First Aid responders should pay attention to self-protection and use the recommended protective clothing. If potential for exposure exists refer to Section 8 for specific personal protective quipment.* 

• After inhalation:

Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist. In case of unconsciousness place patient stably in side position for transportation.

- · After skin contact: Suitable emergency safety shower should be immediately available.
- After eye contact: Rinse opened eye for several minutes under running water.
- · After swallowing:

*Immediately call a doctor.* 

Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person.

• Information for doctor:

Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.

• Most important symptoms and effects, both acute and delayed No further relevant information available.

· Indication of any immediate medical attention and special treatment needed

No further relevant information available.

### 5 Fire-fighting measures

- · Extinguishing media
- Suitable extinguishing agents:
- CO2, extinguishing powder or water spray. Fight larger fires with water spray.
- Use fire fighting measures that suit the environment.
- For safety reasons unsuitable extinguishing agents: Do not use direct water stream. May spread fire.
- Special hazards arising from the substance or mixture There are no known unusual fire or expolsion hazards.
- Advice for firefighters
- · Protective equipment:
- Mouth respiratory protective device.

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. PVC boots, gloves, safety helmet and protective clothing should be worn.

• Additional information

Keep people away. Isolate fire and deny unnecessary entry. Use water spray to cool fire exposed containers. Fight fire from protected location or safe distance. Move container(s) from fire area if this is possible without

hazard. Burning liquids may be moved by flushing with water to protect personnel and minimize property damage. Contain fire water run-off if possible. Fire water run-off if not contained, may cause environmental damage.

#### 6 Accidental release measures

· Personal precautions, protective equipment and emergency procedures

Isolate area. Keep unnecessary and unprotected personnel from entering the area. Spilled material may cause slipping hazard. Refer to Section 7, Handling, for additional precautionary measures. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection.

• Environmental precautions:

Prevent from entering into soil or ditches. Inform the relevant authorities if the product has caused environmental pollution.

Do not allow to enter sewers/ surface or ground water.

• Methods and material for containment and cleaning up:

Ensure adequate ventilation.

Contain spilled material if possible. Absorb with materials such as: Dirt, Sand, Sawdust. Collect in suitable and properly labeled containers. Wash the spill site with water. See Section 13, Disposal Considerations, for additional information.

#### Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

### 7 Handling and storage

· Handling:

· Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace.

Do not swallow. Wash thoroughly after handling. Keep container closed. See Section 8, Exposure Controls and Personal Protection.

- · Information about protection against explosions and fires: No special measures required.
- · Conditions for safe storage, including any incompatibilities
- · Storage:
- Requirements to be met by storerooms and receptacles: No special requirements.
- · Information about storage in one common storage facility: Not required.
- Further information about storage conditions: Keep receptacle tightly sealed.
   Storage Period: 6 months Storage Temp: 15 - 35 ℃
   Specific end use(s) See the technical data sheet on this product for further information.

### 8 Exposure controls/personal protection

· Control parameters

Components with limit values that require monitoring at the workplace:

940912-28-7 Polyether Polyol

WEEL Long-term value: 7.45 mg/m<sup>3</sup>

111-46-6 diethylene glycol

WEEL Long-term value: 10 mg/m<sup>3</sup>

• Additional information: The lists that were valid during the creation were used as basis.

· Exposure controls

· Personal protective equipment:

General protective and hygienic measures:

Keep away from foodstuffs, beverages and feed.

Wash hands before breaks and at the end of work.

Avoid contact with the eyes and skin.

#### • Breathing equipment:

In case of brief exposure at low atmospheric levels use an approved air-purifying respiratory equiped with an organic vapor sorbent and a particle filter. In case of intensive or longer exposure use a positive pressure air-supplying respirator (air line or self-contained breathing apparatus).

• Protection of hands:

Protective gloves

The workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

#### · Material of gloves

Use chemical resistant gloves classified under Standard EN374: Protective gloves against chemicals and microorganisms. Examples of preferred glove barrier materials include: Butyl rubber, Polyethylene, EVAL, Neoprene, Nitrile, Viton. When prolonged or frequently repeated contact may occur, a glove with a protection class of 5 or higher is recommended.

#### Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

• Eye protection:

Tightly sealed chemical goggles consistent with EN 166 or equivalent. Wear a face-shield which allows use of chemical goggles, or wear full-face respirator to protect face and eyes when there is any likelyhood of splashes.

#### Body protection:

Personal protective clothing for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

# 10 Stability and reactivity

• *Reactivity* No further relevant information available.

• Chemical stability This product is stable at recommended storage conditions (See Section 7).

• Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.

• *Possibility of hazardous reactions* No dangerous reactions known.

· Conditions to avoid Avoid moisture to protect product quality.

### 13 Disposal considerations

· Waste treatment methods

· Recommendation:

Waste Disposal: Incinerate in a licensed facility. Do not discharge into waterways or sewer systems.

Container Disposal: Steel drums must be emptied (as defined by RCRA, Section 261.7 or state regulations that may be more stringent) and can be sent to a licensed drum reconditioner for reuse, a scrap metal dealer, or an approved landfill. Drums destined for a scrap dealer or landfill must be punctured or crushed to prevent reuse.

• Uncleaned packagings:

• *Recommendation: Disposal must be made according to official regulations.*
